LMG eNewsletter - September 2013

The LMG Project works with leaders across many areas of the health sector, including those who support HIV and AIDS programs worldwide. This edition of our eNewsletter provides a brief overview of four countries that are receiving leadership and organizational capacity-building support from LMG: Vietnam, Côte d'Ivoire, Honduras, and Ukraine. As you'll see, these programs emphasize country ownership through well-guided leadership, management, and governance of HIV and AIDS programs, evidence-based approaches to problem-solving, and a country-led response.

Vietnam has made significant progress in recent years responding to the country's HIV and AIDS epidemic. Under the ongoing leadership of the Government of Vietnam, the international community, including the U.S. Government, has provided significant technical and financial support to the Government of Vietnam's HIV and AIDS program.
